

SHRUTI JOSHI

Enterprise Application Support | Technical Consultant | ALM Specialist

shruti.joshi1605@gmail.com | +64 021 024 20090 | linkedin.com/in/joshishruti1605 | Wellington, NZ

Recently graduated July 2026 (Pass with Merit) · Post-Study Work Visa in progress · Open to relocate anywhere in New Zealand

PROFILE

I have spent most of my career keeping enterprise applications running across government, defence, and corporate sectors in India, now building a career in New Zealand. I am the person teams call when something breaks, when a system needs configuring properly, or when a client needs help getting the most out of a platform. Recently completed a Master of Professional Business Analysis at Victoria University of Wellington in July 2026 with a Pass with Merit. Currently tutoring at VUW and managing CRM systems at Dress for Success Wellington.

CORE SKILLS

Application support and incident management. At TCS, when JIRA, Polarion, or PlasticSCM went down for 3,000 APAC users, I was the first call. Everything ran on Linux servers. I would log in, check which cluster node the user was on, pull heap dumps and application logs, find what was causing the issue, and get it fixed. Six years, zero SLA breaches. I also looked after JIRA workflow configurations, form setups, user permissions, and version upgrades day to day, and kept the Polarion to JIRA integration running smoothly.

Enterprise ALM toolchain administration. At WESEE I ran the full IBM Rational toolchain on Linux servers for a national defence project. That meant IBM CALM 6.0, Rhapsody, ClearCase, ClearQuest, and JAZZ Build Server. I set up ClearCase and ClearQuest from scratch for the client, built and managed the auto-build process using Jazz Build Engine and ANT scripting, and handled version control, baseline management, and environment setup end to end.

System configuration and platform administration. I have spent most of my career configuring platforms to match how the business actually works. At TCS that meant JIRA, Polarion, and PlasticSCM for 3,000 users. At WESEE it meant setting up the full IBM Rational suite from scratch. At Dress for Success Wellington I administer Better Impact CRM and Monday.com, customise templates, optimise data quality, and keep their volunteer processes running smoothly.

Technical consulting and pre-sales. At Trident I worked with government and automotive clients to understand what they needed, designed IBM Rational toolchain solutions, built Proof of Concept environments so they could see the solution working before committing, and then managed the full implementation through to formal handover. I started at Trident with brief exposure to Microsoft Dynamics CRM 4.0 before moving into IBM Rational as my primary focus.

Vendor and stakeholder management. At TCS I managed day to day relationships with Siemens, Codice, and Atlassian, handling upgrades, patches, and feasibility testing. I kept APAC clients updated through bi-weekly reports and was comfortable picking up the phone when something needed escalating. I am used to working with people at all levels, from end users who just want their system working to senior stakeholders who need clear progress updates.

Problem solving and root cause analysis. When the same incidents kept coming back at TCS, I would dig into the pattern, find what was actually causing them, and fix it properly rather than just closing the ticket. At WESEE when build processes failed, I would work through the Jazz Build logs systematically until I found the issue. I do not like leaving problems half solved.

Testing, releases, and compliance. At WESEE I coordinated UAT, tracked defects through to closure, and made sure releases went into production cleanly. I owned CMMI Level 3 compliance for the whole project, ran monthly internal audits, and led quarterly external audits that came back with zero findings every time.

Training and user adoption. At WESEE I ran training sessions on IBM CALM and Rhapsody. At TCS I regularly helped non-technical clients through things like checking host files in Windows or setting environment variables in Linux. I now tutor Business and Systems Analysis at VUW and find that explaining complex things simply is something I genuinely enjoy.

TECHNICAL SKILLS

Platform administration: JIRA Server (workflow configuration, user permissions, form setup, version upgrades), Polarion, PlasticSCM, IBM CALM 6.0, IBM Rhapsody, ClearCase, ClearQuest, JAZZ Build Server.

Service management: ServiceNow (daily ITIL incident, change and request management); L1, L2 and L3 technical support; SLA management.

Build and integration: Auto-build process via Jazz Build Engine and ANT scripting; Polarion to JIRA integration; version control and baseline management on Linux servers.

CRM and business tools: Better Impact CRM, Monday.com, Microsoft Office, Confluence, Lucidchart, Miro.

Frameworks: CMMI Level 3, TOGAF ADM, Agile delivery, ITIL, SDLC.

NEW ZEALAND WORK EXPERIENCE

Part-Time Tutor, School of Information Management
Victoria University of Wellington

Feb 2026 – Present

In trimester 1 I taught INFO 101 (Me and My Digital Life), covering data literacy, data cleaning, reporting, and storytelling with data. In trimester 2 I am teaching INFO 203 (Business and Systems Analysis), helping students work through real business problems and turn user needs into system requirements using Design Thinking.

HR and Business Support

Mar 2026 – Jul 2026

Dress for Success Wellington, New Zealand

I ran the HR and volunteer operations end to end using Better Impact CRM and Monday.com, managing onboarding and offboarding and keeping records accurate across both systems. I also applied data privacy practices to protect volunteer and client information in line with the NZ Privacy Act.

Business Analyst Industry Engagements

Mar 2025 – Jun 2026

Victoria University of Wellington (Master of Professional Business Analysis, Pass with Merit)

- Cogo (NZ home-energy company): mapped a current-state process, found where it was causing problems, and designed the improved version, including a simulated demonstration for the client.
- Malagan Institute (NZ healthcare organisation): used TOGAF and ArchiMate to map data governance issues across departments and produce recommendations for how they should manage their information going forward.
- DataPriv Enterprise: designed a 12-layer AI governance and security setup across four cloud platforms and built a working interactive prototype. Won first place at VUW's AI Innovation Programme, judged by Kiwibank and BDO.

INDIA WORK EXPERIENCE

Associate Consultant / Team Leader (C3B)

Jan 2019 – Jan 2025

Tata Consultancy Services (TCS), Pune, India. Automotive manufacturing-sector client, based out of Luxembourg and Troy in the US.

I supported enterprise ALM applications (JIRA, Polarion, PlasticSCM) for 3,000 APAC users on Linux servers, holding zero SLA breaches across six years. I led a team of five, used ServiceNow daily for ITIL incident, change, and request management, managed vendor relationships with Siemens, Codice, and Atlassian, and supported the IBM Engineering Lifecycle Management Centre of Excellence on pre-sales proof-of-concept work. Won three On-the-Spot Awards.

Senior Software Engineer

2012 – 2018

Weapons and Electronics Systems Engineering Establishment (WESEE), an Indian Navy unit, Mumbai, India, fixed-term contract role

Six years on the Combat Management System project for INS Vikrant, India's first indigenous aircraft carrier, working across a core team of eight and three government bodies including the Indian Navy. Owned CMMI Level 3 compliance for the project, with zero findings across every audit. Worked alongside IBM GBS consultants on MBSE using the Rhapsody Harmony methodology, producing UML models, FIDs, and state, panel and sequence diagrams.

Technical Consultant (Pre-Sales and Implementation)

2009 – 2012

Trident Information Systems, New Delhi, India

Pre-sales through post-sales configuration on the IBM Rational toolchain for government and automotive clients, from initial requirements through to training and formal handover.

AWARDS & LEADERSHIP PROGRAMMES

- **AI Innovation Programme, First Place Overall (DataPriv Enterprise, 2025).** Designed a 12-layer data privacy architecture aligned to the NZ Privacy Act 2020 and AML/CFT Act. Judged by Kiwibank and BDO.
- **Ako in Action Student Partner, VUW.** Partnered with academics to improve course and learning design.
- **Wellington International Leadership Programme (WILP), certificate.** Completed in Wellington, 2025.

EDUCATION, VOLUNTEERING & INTERESTS

EDUCATION	VOLUNTEERING	INTERESTS
Master of Professional Business Analysis Pass with Merit, Victoria University of Wellington, 2025-2026	Dress for Success Wellington (2026): HR and Business Support.	Music, sudoku, and solitaire (analytical thinking).
MBA , Amity Business School, 2006-2009	BA Career Meetup Wellington (2025): Wellington BA community.	Walking and observing people (curiosity about behaviour).
BE Information Technology , Rajasthan University, 2002-2006	Ako in Action (2025-2026): VUW learning design partnership.	Zentangle art (mindfulness and creativity).
