SUMMARY

Recently graduated with a Master of Professional Business Analysis from Victoria University of Wellington (Pass with Merit, July 2026). I work well with people, ask the right questions, and make sure what gets built actually matches what was agreed. Background spans NZ energy, healthcare, and not-for-profit sectors, plus national defence, automotive manufacturing, and enterprise consulting in India.

CORE SKILLS

Requirements analysis. Gathered BRDs, FRDs, SRDs, user stories, and acceptance criteria using interviews, workshops, and document analysis. Used SWOT at Cogo and PESTLE for environmental and situational analysis. Good at getting people to open up about what they actually need, not just what they say they need.

Process modelling and improvement. Mapped As-Is and To-Be processes using BPMN 2.0. Applied DMAIC from Lean Six Sigma to identify improvement opportunities. Used 5 Whys at TCS to get to the real cause of recurring incidents rather than just fixing the symptom.

Enterprise architecture. Applied TOGAF ADM across Phases A to D and built ArchiMate As-Is and To-Be models at Malagan Institute. Worked on full MBSE model creation using Rhapsody Harmony methodology alongside IBM GBS consultants.

Stakeholder engagement and facilitation. Ran requirements and change workshops across government, healthcare, and energy sectors in NZ and India. Comfortable working with people at all levels. Currently teaching Business and Systems Analysis at VUW using Design Thinking.

Quality and testing. Wrote test cases and test plans, performed functional and manual testing, tracked defects through to closure. Owned CMMI Level 3 compliance at WESEE with zero audit findings across six years. Applied NZ Privacy Act practices at Dress for Success Wellington.

Agile and Scrum. Working knowledge of Agile delivery and Scrum. Ran sprint planning and story-point estimation at TCS across six years. Comfortable adapting when priorities shift and keeping the team moving.

TECHNICAL SKILLS

Analysis tools: BPMN 2.0, UML, ArchiMate, TOGAF ADM, MBSE (Rhapsody Harmony), PESTLE, SWOT, 5 Whys, DMAIC (Lean Six Sigma), Gap analysis, Requirements elicitation

Documentation: BRD, FRD, SRD, user stories, acceptance criteria, traceability matrices, test cases, test plans, functional testing, defect tracking

Platforms: JIRA, Polarion, IBM CALM 6.0, IBM Rhapsody, ClearCase, Better Impact CRM, Monday.com, ServiceNow, Microsoft Office, Microsoft Power BI

Frameworks: CMMI Level 3, Agile, Scrum, ITIL, Design Thinking, SDLC, V-model, Waterfall, Lean Six Sigma (DMAIC)

NZ WORK EXPERIENCE

Part-Time Tutor, School of Information Management

Victoria University of Wellington | Feb 2026 to Present

- Teaching INFO 203 Business and Systems Analysis using Design Thinking, helping students work through real business problems and turn user needs into system requirements
- Taught INFO 101 Digital Life in trimester 1, covering data literacy, data cleaning, and reporting

HR and Business Support

Dress for Success Wellington | Mar 2026 to Jul 2026

- Ran volunteer and HR operations end to end using Better Impact CRM and Monday.com
- Mapped current-state processes, redesigned them, and configured systems to match the new workflows
- Applied NZ Privacy Act data practices and maintained accurate records throughout

Business Analyst Industry Engagements

Victoria University of Wellington (Master of Professional Business Analysis, Pass with Merit) | Mar 2025 to Jun 2026

Cogo (NZ home-energy company): Process Improvement

- Sat with the team, used SWOT and BPMN 2.0 to map the current process and find where it was slowing down
- Identified key pain points and bottlenecks by asking the right questions and observing how the team actually worked day to day
- Redesigned the process and built a working simulation so the client could see the new version before anything changed
- Produced gap analysis report and requirements specification for the next stage of implementation
- Presented findings and recommendations to the client team and incorporated their feedback into the final design

Malagan Institute (NZ healthcare organisation): Data Governance

- Used TOGAF ADM and ArchiMate to map data governance challenges across departments
- Conducted stakeholder interviews across departments to understand how information was being managed and where the gaps were
- Produced As-Is and To-Be architecture models showing the current state clearly and the recommended future state
- Delivered recommendations on data ownership, governance structure, and how information should flow across the organisation

- Documented findings in a structured report presented to the client stakeholders

INDIA WORK EXPERIENCE

Associate Consultant / Team Leader (C3B)

Tata Consultancy Services (TCS), Pune, India | Jan 2019 to Jan 2025

- Looked after JIRA, Polarion, and PlasticSCM for 3,000 APAC users on Linux servers. Six years, zero SLA breaches
- Used 5 Whys to find the real cause of recurring incidents, not just fix the symptom, which meant they actually stopped coming back
- Led a team of five using Agile and Scrum, ran sprint planning and story-point estimation, managed vendors Siemens, Codice, and Atlassian
- Configured JIRA workflows, forms, and user permissions to match how the client's engineering and manufacturing teams actually worked
- Prepared and delivered bi-weekly status reports and month-end updates to APAC stakeholders, keeping everyone informed
- Selected for IBM ELM Centre of Excellence for pre-sales PoC work. Won three On-the-Spot Awards

Senior Software Engineer

WESEE, Indian Navy unit, New Delhi, India | 2012 to 2018

- Appointed to work with IBM GBS consultants on full MBSE model creation for INS Vikrant using Rhapsody Harmony methodology (Peter Hoffmann)
- Sat with Indian Navy personnel to understand what their systems needed to do, wrote it up as functional and non-functional specs with example data so nothing was left to guesswork
- Ran requirements and change workshops across three government bodies (IN Navy, TPSED, DB Systems), kept them aligned across six years even when they did not always agree
- Created the Project Management Plan, produced WBS and risk registers using UCP method and Affinity Mapping, made sure project timelines did not slip
- Owned CMMI Level 3 compliance, zero audit findings across six years. Produced TOGAF ADM deliverables across Phases A to D. Two Best Performance Awards

Technical Consultant

Trident Information Systems, New Delhi, India | 2009 to 2012

- Built IBM Rational PoC environments for central government and automotive clients, configured tools to match workflows, managed full engagement from requirements to handover
- IBM RQM certified

AWARDS AND ACHIEVEMENTS

- AI Innovation Programme, First Place Overall, DataPriv Enterprise, 2025. Designed a 12-layer AI governance architecture across four cloud platforms, aligned to NZ Privacy Act 2020 and AML/CFT Act. Judged by Kiwibank and BDO
- Promoted from C3A to C3B grade at TCS and selected for IBM ELM Centre of Excellence based on performance
- Two Best Performance Awards, WESEE. Received for CMMI Level 3 process mapping workshops and IBM Rational tool integration
- Three On-the-Spot Awards, TCS. Service delivery, process optimisation, and client service
- Ako in Action Student Partner, VUW. Partnered with academics to improve course and learning design
- Wellington International Leadership Programme, certificate, 2025

EDUCATION, VOLUNTEERING AND INTERESTS

Education

Master of Professional Business Analysis (Pass with Merit), Victoria University of Wellington, 2026

MBA, Amity Business School, India, 2009

BE Information Technology, Rajasthan University, India, 2006

Volunteering

IIBA NZ Wellington Branch, volunteer member | BA Career Meetup Wellington, 2025 | Ako in Action, VUW, 2025-2026

Interests

Music, sudoku, solitaire. Walking, Zentangle art.
